## EDUCATION AND CERTIFICATES

[RS School:](#)

- [NodeJS 2022 Q2](#)
- [React 2022 Q1](#)
- [JavaScript/Front-end 2021Q3](#)
- [JS/FE Pre-School](#)

[Graph Developer - Associate](#)

[Online Simtech School](#)

[EF SET English Certificate 37/100 \(A2 Elementary\)](#)

## KNOWLEDGE IN

- TypeScript
- JavaScript
- PostgreSQL
- Material UI
- Express.js
- MongoDB
- TypeORM
- AdonisJs
- GraphQL
- Postman
- React.js
- Node.js
- NestJS
- HTML
- SASS
- CSS
- SQL
  
- Procedural Programming
- Adobe Lightroom
- Docker
- Figma
- GitHub
- OOP

## CAREER OBJECTIVE

I constantly develop professional skills by taking courses on freecodecamp, linkedin, coursera, RS School and solving problems on codewars, doing interesting test tasks.

Looking for a position as a Full Stack Developer where I can utilize my skills and experience in developing web-based software.

## WORK EXPERIENCE

### Front-End Developer (ReactJs, TypeScript, MaterialUI, GraphQL, Axios)

#### Contract

📅 **October 2022 - February 2023** 📍 [iotans.io](#) (Water collection and metering systems based on NB-IoT and LoRaWAN networks)

- implemented a modal window "what's new?"
- added additional information to sensor cards
- implemented a new tooltips
- refactoring of old code, work with a common ui library in a multiservice application

### Back-End Developer (AdonisJs, TypeScript, SQL, React.js)

#### freelance

📅 **December 2021 - October 2022** 📍 [rento2](#) (housing rental service)

- Implemented a route with filtering and sorting according to JSON data for the catalog of apartments
- Added entities from the back to the admin panel
- Implemented sending notifications for successful orders in a Telegram Bot
- Implemented filtering for a data from the database
- Implemented validation of field names in queries in the database
- Implemented the 'db:reset' script - delete and refill the database with tables and data
- Implemented and maintained the swagger
- Added new features to the project (add/change fields in DB tables, develop logic for calculating the metro line, creating routers, seeders, factories, entities and their validation)

## STUDENT

📅 **February 2023 - current** 📍 [Online Simtech School](#)

[Web Development](#) (2023-02-20 - current)

learned and had hands on experience with:

- PHP, CMS CS-Cart, QA(Codeception), fundamentals of relational databases

- implemented a Contact-form in PHP and MySQL ([gitHub](#))
- implemented 'Departments' CS-Cart add-on
- implemented 18+ verification CS-Cart add-on

- built MySQL database schemas for the Contact-form app and Departments module

- tested API with Codeception

📅 **July 2022** 📍 [Apollo Odyssey](#)

[Graph Developer - Associate](#) (2022-07-07 - 2022-07-11)

learned and had hands on experience with:

- GraphQL & Apollo basics
- Resolvers, arguments, mutations

### [NodeJS 2022 Q2 course](#) (2022-05-30 - 2022-08-13)

- implemented a CLI file manager with a Streams API similar to Git Bash
- implemented a vanilla Node.js CRUD API using an in-memory database
- implemented a remote control backend logic using RobotJS library and websocket
- connected microservices for a Musical service with GraphQL
- implemented RestAPI for a Musical Service using NestJS. Implement authorization and authentication with JWT tokens
- built PostgreSQL database schemas using TypeORM for the Musical Service
- developed Docker configuration to run it in the containers
- tested API with Postman

### [React 2022 Q1 course](#) (2022-03-21 - 2022-05-31)

- implemented single-page application (SPA) with components, react-router, forms, API, hooks, redux
- tested app with React Testing Library
- [final team challenge: Project-management-app](#)

### [JavaScript/Front-end 2021 Q3 course](#) (2021-09-05 - 2022-03-22)

learned and had hands on experience with:

- CoreJS, TypeScript
- HTML, CSS, Preprocessors(SASS)
- Git, GitHub
- Webpack,
- Chrome Dev Tools, VS Code, Markdown
- Figma, pixel perfect design
- Design Patterns, algorithms, data structures, clean code, testing
- Terminal, HTTP/ HTTPS, RESTful API, async programming
- [final team challenge: RS-lang](#)

### [JS/FE Pre-School course](#) (2021-07-05 - 2021-08-31)

- core web apps engineering knowledge and programming
